Muhammad Daniel Assaqovi

Web Developer & QA Engineer

hpdaniel828@gmail.com · Indonesia
linkedin.com/in/muhammad-daniel-assaqovi · github.com/danielassaqovi

Summary

Informatics Engineering student at Politeknik Negeri Malang focused on full-stack development and software engineering, with a strong interest in quality assurance, scalable applications, database design, and software testing. Builds web and mobile applications with PHP/Laravel, JavaScript/Node.js, and Flutter, then verifies them through automated testing with Playwright, Cypress, and Postman. Works comfortably with Git, Docker, and Linux, and documents every project so results are reproducible.

Education

Sarjana Terapan Teknik Informatika — Politeknik Negeri Malang (2024 – Present)
- Applied bachelor programme covering software engineering, full-stack web development, database design, and software testing.

Teknik Jaringan Komputer dan Telekomunikasi — SMKN Darul Ulum Muncar (2021 – 2024)

Organization

Chairperson — IKAWANGI Polinema (Nov 2025 – Present) · Kota Malang, Jawa Timur

Project Experience

Universal Website Testing — Automated QA Toolkit (2026)
- Read-only Playwright suite that can be pointed at any URL to check HTTP status, page titles, navigation, links, images, forms, and responsive layout.
- Executed against jti.polinema.ac.id/dermaga: 15 of 19 checks passed (83.3%), surfacing real horizontal overflow of 360px on desktop, 203px on tablet, and 98px on mobile.
- Single Docker command produces HTML and JSON reports with failure screenshots; unavailable elements are reported as SKIP instead of a false PASS. Source: github.com/danielassaqovi/automation-website-testing-DERMAGAJTI

Universal Mobile QA — Config-Driven Mobile Testing Framework (2026)
- Modular Dart CLI for Android QA with YAML application configs, reusable test suites, and ADB device transport.
- Commands cover device-check, list-apps, test --app --suite, and report, producing JSON and HTML artifacts with screenshots; Docker Compose forwards ADB to the host.
- Runs without an authorized device are recorded as skipped rather than passed. Source: github.com/danielassaqovi/universal-mobile-qa

SIAKAD QA Automation — Academic System Test Suite (2026)
- Playwright suite for SIAKAD Politeknik Negeri Malang covering public pages, login validation, accessibility, and responsive layout.
- 18 public tests pass against production; authenticated coverage crawls every sidebar menu and maps academic features such as KRS, KHS, transcript, schedule, and attendance.
- Credentials come from environment variables so the repository stays free of sensitive data; includes Docker and GitHub Actions workflows. Source: github.com/danielassaqovi/siakad-qa-automation

PBL InLET — Live Laboratory Website (2026)
- Information website for the InLET laboratory at Politeknik Negeri Malang: research pillars, member directory, news, products, partners, and lab services.
- Presents four research pillars in a readable matrix and unifies research, product, and partner content under a single navigation structure.
- Deployed publicly on Vercel. Live: pblinlet.vercel.app · Source: github.com/FALAA-1285/PBL-InLET

PBL JTify — Web Application Project (2026)
- Web application built as part of Project Based Learning, focused on responsive interface work and iterative feature development.
- Source: github.com/RizkyFirdiansyah/pbl_jtify

Certifications

- **Automation Testing** — MySkill (Nov 2026)
  MS-20261108-nE31QeE7N2TUD2X72p7K
- **Quality Assurance Fundamental** — MySkill (Nov 2026)
  MS-20261108-LHrO8ysh8p7zNmUaJiJc
- **Quality Assurance in Software Development Life Cycle (SDLC)** — MySkill (Nov 2026)
  MS-20261108-2X6RMg2e9mg7UbhpAyIq
- **Dasar Pemrograman Web** — Dicoding Indonesia (2026)
  L4PQWRW77PO1
- **Introduction to Financial Literacy** — Dicoding Indonesia (2026)
  EYX4O1O5JXDL

Skills

- **Programming Languages:** PHP, JavaScript, Python, Dart
- **Frontend Development:** HTML, CSS, JavaScript, Tailwind CSS
- **Backend Development:** PHP, Laravel, Node.js
- **Mobile Development:** Flutter
- **Databases:** MySQL, PostgreSQL
- **Software Testing & QA:** Playwright, Cypress, Postman
- **Development Tools:** Git, GitHub, Visual Studio Code, Docker, Docker Compose, Linux, Vercel
